The *Journal* is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/89/$5.00+ .00

ISI Tear Sheet Servicee, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published by the Cambridge University Press in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £38 net (US $75 in the USA and Canada) plus postage. The subscription price in the UK (which includes postage) to volumes 198–209, 1989, is £410, £450 elsewhere (US $880 in the USA and Canada) for institutions: £225 (US $450) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573.

Volume 208 November 1989

CONTENTS

Origin of the peak–valley wave structure leading to wall turbulence. Masahito Asai and Michio Nishioka *page* 1

Loss of frequency response along sampling tubes for the measurements of gaseous composition at high temperatures and pressures. Ronald Smith 25

Numerical simulations of transition in oscillatory plane channel flow. Bart A. Singer, Joel H. Ferziger and Helen L. Reed 45

Linear instability of the wake behind a flat plate placed parallel to a uniform stream. D. T. Papageorgiou and F. T. Smith 67

Velocity-derivative skewness and two-time velocity correlations of isotropic turbulence as predicted by the LET theory. W. D. McComb, V. Shanmugasundaram and P. Hutchinson 91

Lagrangian approach to the mean-field electrodynamics for turbulent fluids with arbitrary conductivities. L. L. Kichatinov 115

Modulated Taylor–Couette flow. C. F. Barenghi and C. A. Jones 127

Buoyancy-driven motion of a deformable drop through a quiescent liquid at intermediate Reynolds numbers. David S. Dandy and L. Gary Leal 161

The effect of large-eddy breakup devices on flow noise. A. P. Dowling 193

Experiments on the forced wake of an airfoil. M. Gharib and K. Williams-Stuber 225

Elliptic jets. Part 1. Characteristics of unexcited and excited jets. Fazle Hussain and Hyder S. Husain 257

The fluid mechanics of slide coating. K. N. Christodoulou and L. E. Scriven 321

Separation in a gas centrifuge at high feed flow rate. Zhang Cunzhen and A. T. Conlisk 355

Critical geometry of oscillating bluff bodies. Yasuhara Nakamura and Katsuya Hirata 375

The distortion of short internal waves produced by a long wave, with application to ocean boundary mixing. S. A. Thorpe 395

Near-wall structure of a turbulent boundary layer with riblets. Kwing-So Choi 417

Axisymmetric convection at large Rayleigh and infinite Prandtl number. Akira Umemura and F. H. Busse 459

Upper bounds on functions of the dissipation rate in turbulent shear flow. W. V. R. Malkus and L. M. Smith 479

Growth of bioconvection patterns in a suspension of gyrotactic micro-organisms in a layer of finite depth. N. A. Hill, T. J. Pedley and J. O. Kessler 509

Planetary semi-geostrophic equations derived from Hamilton's principle. G. J. Shutts 545

Dendritic growth of an elliptical paraboloid with forced convection in the melt. Ramagopal Ananth and William N. Gill 575

Long-period oscillations in a harbour induced by incident short waves. Chiang C. Mei and Yehuda Agnon 595

Inviscid spatial stability of a compressible mixing layer. T. L. Jackson and C. E. Grosch 609

Wave patterns in plane Poiseuille flow created by concentrated disturbances. Fei Li and Sheila E. Widnall 639

Reviews

Electrically Induced Vortical Flows, by V. Bojarevičs, Ya. Freibergs, E. I. Shilova and E. V. Shcherbinin 657

Visualized Flow, edited by Y. Nakayama, W. A. Woods and D. G. Clark 658

Index to Volume 208 660
